

PROGRAMMES

Pre-primary

Our Pre-primary education curriculum focuses on the basic foundational concepts of education. It is designed to focus on language development, math skills, knowledge and humanities, general awareness, creative arts and crafts, and music helping each child develops a polished personality at a tender age.

Objectives:

- ❖ Providing the right start for emotional and educational growth
- ❖ Developing interpersonal skills
- ❖ Generating and keeping alive curiosity, an essential ingredient for learning
- ❖ Developing a healthy attitude, social awareness, and etiquette
- ❖ Initiation of globally accepted learning methodologies.

Primary

Our primary curriculum forms the first stage of formal schooling where children are taught the basics of literacy, numeracy and environmental studies. A comprehensive program that focuses on developing knowledge, skills, values, sportive spirit & intellectual aspects in children. The system achieves Overall Development of children through a right mix of conventional and out-of-the-box techniques.

Objectives:

- ❖ To make learning fun by introducing elements beyond the four walls of the classroom.
- ❖ To develop knowledge and skills of a student in stages.
- ❖ To address both the physical and cognitive needs of the child.
- ❖ To give equal attention to the intelligence and emotional quotients of the child.
- ❖ To induce the right kind of aptitude for global success.
- ❖ To create a focused perception through unique teaching methodologies.

High School

Our High school curriculum stresses on developing professionals out of students by instilling in them a career-oriented approach to academics. We devised a strong Curriculum, integrating the components of Maths, Physics, Chemistry and Biology which are needed for the various Entrance Exams under the name of CURRICULUM.

The Content Matter is divided into optimum doses so that the students do not feel overburdened with the syllabus. At the same time care is taken to see that the Components of the Techno Curriculum are strictly according to their Normal Course of Study related to the Class in which they are studying at present. This makes them study their present syllabus in depth with the help of the Micro Level Teaching, providing them the chance of improving their performance in the current Class in which they are studying.

Objectives:

- ❖ To focus on an interactive learning process.
- ❖ Bring forth the child's inner capabilities.
- ❖ To prepare a result-oriented program for success in competitive exams.
- ❖ Groom the child to communicate effectively.
