LAYING A STRONG FOUNDATION FOR FUTURE SUCCESS

Sri Chaitanya, the byword for success in any competitive examination, especially in engineering & medical, has taken giant strides since its humble beginnings with a Girls Junior College in Vijayawada in the year 1986. Sri Chaitanya is the brainchild of a visionary couple, Dr. B.S.Rao & Dr. Mrs. B .Jhansi Lakshmi Bai, who made a commitment to put Indian education on the global map. They quit their flourishing doctor practice abroad & set themselves to the task of redefining education, lending it a competitive global edge.

A VISION THAT EMBRACES THE FUTURE TODAY

These are exciting times with so many wonderful things happening across the globe. The seeds of success lie in a strong foundation of research based programmers. Sri Chaitanya Schools were started with purpose of giving students an early advantage. Going to school is the formal step that precious Child takes for his bright future. We thank the parents for showing their faith in Sri Chaitanya. We wish every child a brilliant future as they make steady progress in Sri Chaitanya.

The aim of education is not the knowledge, not of facts, but of values

- William Shakespeare

Sri Chaitanya Techno School -Curriculum believes that a young & energetic leadership can only produce young & energetic leaders. These future leaders shall be all -equipped to take any decision about themselves. without consulting anybody. A leader like Mrs. Seema, Director of Sri Chaitanya Schools, has proved her forte in converting education from a system into a philosophy.

PRIMARY
DIGITAL LEARNING FOR THE DIGITAL W0RLD.

Our primary education curriculum forms the first stage of formal schooling where children are taught the basics oflitcracy, numeracy & environmental studies.

Sri Chaitanya has always advanced with the evolving times. Consequelltly, the school has introduced digital tablets to stay abreast with the progressive world.

- Minimizes the physical burden & maximizes interacting learning. Encourages paperless work flow to a great extent.

- Includes multimedia (voice pictures & videos) in classrooms for effective relay for knowledge.

MIDDLE SCHOOL

Excellence is an art won by training & habituation.

Our middle school education curriculum stresses on developing professionals out of students by instilling in them a career - oriented approach to academics.

Every child has some innate qualities that help in outshining others The expert faculty members of Sri Chaitanya Techno School identify these latent qualities & covert them into child's specialities. The children are not forced to study but the atmosphere stimulates them to study. Enjoying to study & learn, the child makes continuous efforts. Be it any challenge in life or career these children overcome all odds & come out in life with flying colours.

Developing Global Achievers
